What do You Take Medicine For?

Because you are sick, and want to get
well, of course.

Then remember, that Hood's Sarsaparilla
cures.

All we ask is, that in taking Hood's
Sarsaparilla you will do so with perseverance,
and giving up or approaching the tenacity
with your complaint has clung to you.
It takes time and care to eradicate old
and deep-seated maladies, particularly
when they have been so long hidden in
the system that they have become chronic.
Remember, that all permanent and positive
cures are brought about with reasonable
moderation. Hood's Sarsaparilla attacks
disease vigorously and never leaves the
field until it has been cleared.

Lord and Lady Aberdeen's Visit.

Lord and Lady Aberdeen and party
arrived in Brandon early on Friday
morning in their private car. This was
the day set apart by them for their visit
to the Western city. The weather, though
not as bright as was wished, was an im-
provement upon the weather of the week.
A bit in the clouds, as it were, of a
whole week, whose sky had been
overcast with dark, leaden clouds of back-
ness. The time set for their Excellencies
visit was not a far enough ahead to
allow of any very elaborate preparations
being made to extend a more general
welcome, though an egregious draft pro-
gramme has been made, which was to
include processions, displays and to end
with luncheon in the city hall. A telegram
from Lord Aberdeen, however,
unofficially reduced the preparations. He
instructed the afternoon to be left free
to enable him to transmit any official busi-
ness requiring his attention. The vice-
regal party were timed to leave the sta-
tion at 10 a.m., which was crowded with
people eager to catch a first glimpse of
the Queen's representatives. As the party
approached the platform, a cheer arose
from the enthusiastic crowd.
Their Excellencies, smilingly bowed as
they greeted them, and were escorted to
the waiting carriage. Lady Aberdeen
leaning upon the arm of Mayor McMillan
and came first, followed by Lord Aberdeen
and Senator Kirchhoff and their
children. Lord and Lady Aberdeen
and Hon. Archie Gordon. The
royal visitors were then driven up 11th
street, along Rosser ave. to 10th street,
thence to central school. The school
children assembled from all the schools
in town were arranged along the sidewalks,
who greeted their Excellencies with
sweet strains of the National Anthem as
they entered the building. It was pleas-
ing welcome, and showed many words
of sympathy and hearty recognition from
the visitors. Mr. J. A. Christie, on be-
half of the school board, then read and
presented the following address:

To The Right Hon. Sir John Campbell
Hamilton Gordon, Earl of
Aberdeen, and Governor General
of Canada.

MAY IT PLEASE YOUR EXCELLENCY,—
Knowing your Excellency's deep inter-
est in the concerns of the welfare of the
people of the West, we, the representatives of
the people of the West, feel it a privilege
to present to you the Representative of Her
Majesty, Queen Victoria, it is felt that
the welcome offered you by the citizens
of Brandon would not be complete without
the respectful greeting of those in charge
of the educational interests of this city.

There is no more gratifying illustration
of the educational advancement of which
has marked Her Majesty's reign than
the progress which has been made in
the matter of education. A late Chief
Justice of England in a survey of the
history of the last century remarked of
those times that the principle was re-
versed as in our time the ignorance of
the people was necessary to the exis-
tence of law. In how much we are
better off today we are evidenced by
the activity of all the Governments of
the Empire in furthering by the best
and most modern methods of the education
of the people; and by the interest evinced
in the advancement of knowledge by Her
Majesty the Queen and by her Repre-
sentatives elsewhere. Canada, indeed, in
this matter, is particularly favored, in
that it has at its head one who has been
so long and closely identified with the
cause of education; and it is a matter for
congratulation that his high position is
shared by a lady who has manifested
so great an interest in the spread of in-
formation, and in the ministry of culture.

The members of the Board of School
Trustees of this City desire therefore to
express to your Excellency and to Her
Ladyship, the Countess of Aberdeen,
their gratification at the opportunity of
welcoming you to Manitoba, and particu-
larly to the Wheat City of the West.

The time of your visit, as far as edu-
cational matters are concerned, is particu-
larly fortunate in view of the fact that the
Western Teachers' association, an organi-
zation representing practically all who are
engaged in the work of instruction in the
Western part of the province, is at
present in session in this city.

We feel sure that we represent the
sentiments of every friend of education,
and of social advancement in Manitoba,
when we assure your Excellencies of our
loyal respect and hearty well-wishes. We
trust that your visit to the West will be
attended with much pleasure and interest,
and that we may again at some future
time be enabled to welcome you to our
City.

On behalf of the Board,
JOHN A. CHRISTIE,
Chairman.

His Lordship in reply thanked them
for the address. In his remarks he
suggested that manual instruction be a
part of school education. And complimen-
ted the city upon their system of teaching.

LAURIER AND THE C.P.R.

As yet there is not a word from Mr. Laurier as to what he would do in office to reduce railway rates on farm products to the east. Oratory galore he is giving the people even to psalm singing, but not a word on what, of all other subjects, most concern the people. Some will say if the rates are high now why did not the farmers complain when they were higher. As a rule farmers lack that business principle that is possessed by many other classes of the people, and they only reflect and consider their drawbacks when they find they are falling behind or making no headway. High duties and high railway rates—the main, we might say, the only, obstructions in the way of successful farming were here from the commencement of operations, with the opening of the C.P.R., but when yields were fair, prices good and the consequences of debt had not yet been severely felt farmers complained but little. Now they are feeling the burdens from all directions and they are uttering their most grievous objections. The tariff modifications made have been of considerable service though more must be made, but the railway rates remain unaltered, and Mr. Laurier, who wants to go into office with his hands clean, has not a word of promise to offer. This must be taken to mean he cannot afford to antagonize the railway vote of the country—that is of infinitely more importance to him than the success of the farmers of the Northwest. We have before now pointed out how this amelioration of Northwest wrongs can be arrived at. The C.P.R. as a business stroke on their part are fusing the earnings and expenses of their entire system. Canadian, American and Northwest branches and connections as meaning the C.P.C. proper, and because the gross earnings of the whole, deducting operating expenses, do not pay a dividend of 10% on the entire stock in the whole enterprise, watered and all as much as it is, they claim they are within the wording of the contract that allows them 10% on capital invested. That is their stand in a nutshell.

Nothing, however, was contemplated in the contract, but their main line from Ottawa to the Pacific coast and the Northwest branches, and when the earnings on these, over cost of operation, exceed 10% on the actual cost of the road to the company in cash, they are subject to the controlling conditions of the contract. It appears to us nothing is simpler than this, and it should afford ample ground on which any statesman can stand in contending for the rights of the settlers of this country. It may not suit the peculiar exigencies of the pettifogging politician who has only office for himself and his friends in view, but it is ample for the man who has the rights of the struggling settlers of this country in view, and desires to live in history.

"A TRIUMPHAL MARCH."

Some of our Grit confreres are now yelling themselves hoarse over Mr. Laurier's "Triumphal Tour." From this point of view it is, doubtless, pleasing that he is permitted to march his colleagues up the hill and march them down again: he is seeing the sights of the Northwest, living on the best the country affords, and is rarely troubled with questions at his meetings and never with opposition for the reason that he allows none. Under such circumstances his "march" ought to be pleasing enough to himself, and if playing with words and committing himself to nothing satisfies his Grit friends, he should offer no complaint. We are all frank enough to acknowledge some further modification in the tariff would be acceptable to the people of this country, but what has Mr. Laurier to say about it? He says if entrusted with office, he cannot promise Free Trade for the present, but will so re-arrange the duties that the burdens will fall on the richer classes, while relief will come to the poor. These are fine words; but he does not commit himself to particulars.

In 1873 he and his stepped into office by accident, and finding a general 15 per cent tariff in force they advanced it to 17%, and even then fell over a million and a quarter of dollars short every year of meeting the demands on the treasury. They helped the poor man out by taxing his 2½c tea 30 per cent, which is now free, but they made restitution for that by letting in the said poor man's oil paintings free, which are now taxed 35 per cent. The public would like to know

if Messrs. Laurier & Co. have learned anything since they were in office before, or if it is their intention to merely substitute their former tariff for the one that is at present in force. It appears to us, it would give the public much pleasure if Mr. Laurier would halt on some point of his "Triumphal March" and throw some light on this and similar matters for the benefit of an anxious community.

It is not, of course, always expected that the leader of the Opposition should give in detail his policy on all issues of vital importance; but it is always expected he should give some reasonable outline of the reforms he intends to make when entrusted with responsibility, and the more incumbent is this upon a party that have already been tried and rejected by the people—we say already tried as it is Cartwright and many others of the late Mackenzie government that would again form the ministry if there was a change of government. Yes, let us have some facts and less flummery.

EASILY FED.

If the food that some Grit printers feed out to their readers weekly satisfies them, all any discerning man has to say as they are easily satisfied. Read this, for instance, from last week's *Delaware Times*:

Canada must follow and adopt the British trade policy before it can ever take the place among nations that its natural wealth of mine, forest, farm and lakes and rivers entitle it to.

As a matter of fact there is no Free Trade country on the face of the globe, even England puts a duty on coffee and many other imports—it is only called Free Trade then because the duties are on fewer articles than they are on in any other country. Our readers will remember that about fifteen years ago the Hon. E. Blake made a speech at Malvern, Nova Scotia, that startled his party to the very centre by declaring that because of Canada's obligations Free Trade was practically impossible in Canada, and now even Mr. Laurier himself tells the people if in office he could not for the present give them Free Trade. When in power before instead of diminishing the duties he and his advanced them, and he cannot assure the people he could do any better even now. It has then remained for the *Delaware Times* to take a step in advance of these two Great Reform leaders, and the *Times*' step is like this: If a patient is sick of the measles feel him quinine because Doctor Cure All gave quinine to a man who had the ague a week ago, and it cured him. Does it ever occur to the *Delaware* editor that Canada is in any substantial respects differently situated from Great Britain. If an English manufacturer establishes himself in business, he can get all the money he wants at 3 or 4 per cent to float his business, while an American or Canadian will have to pay from 7 to 10 per cent for his capital. The Englishman again finds his coal and iron, in fact most of his raw materials lying side by side in the earth necessitating no outlay for freights, and the very reverse of this is true of the American continent. Again an English manufacturer can ship direct to the markets that Americans are trying to reach through long expensive land carriage, by water direct, giving him a great advantage in freights, and finally he can get his labor for much less than Americans will be for many a long day compelled to pay. Over and above all these considerations English manufacturers had their businesses built and trade connections established before the American and Canadian people had the trees cut off the sites of their present industries. If this is all ascribed Hebrew to our *Delaware* confrere, the fault is not ours.

But let us take the Canadian demands for revenue as they are understood by Messrs. Blake and Laurier and lay the facts before our *Delaware* confrere for his future reflection. As the *Times* man is a prohibitionist as well as a Free Trader, he would abolish the \$8,377,333 collected from excise as well as the \$20,904,000 from customs (1893 accounts), and would face "the frowning world" with a revenue of less than \$2,000,000 a year, the receipts from all other sources—post office, lands, railways, &c., to run the country, which is less than the total of the interest on the public debt \$9,703,888 and subsidies to provinces \$3,935,764 alone. If the *Delaware Times* man had his way either all the other expenses of the country—the full cost of running the machine made up of maintaining civil government, penitentiaries, quarantine, pensions, postal service, legislation, lands, railways and canals, ocean and river service, &c., &c., would be covered either by direct taxation or by drafts on the moon. Whether or not manufacturers should be kept alive in the country by a revenue or protective tariff, how the expenses of government barring the two items cited above could be reduced, and how the tariff should be raised on this article and lowered on that, that the collections should cover the expenditures, are debatable questions, but none but men too angelic for earth will talk of running the Canadian government without a tariff, the *Delaware* man to the contrary notwithstanding.

Toronto Globe—"The position of the Tory protectionists on the prairies of the Northwest is desperate. They cannot even take to the woods."

That is true, but they can take to the balloons, which will give consolation to the Globe.

The Free Press says that many Saskatchewan Grits drove 140 miles through a blinding storm to see Mr. Laurier. It was that musket of his that he promised to shoulder in support of the rebellion against the Federal government, they went out to see.

The great Mr. Laurier has spoken in Brandon, and we but repeat the sentiments of many Grits as well as Conservatives when we say the public are disappointed. That he is a good speaker, employing good language in well constructed sentences, no one can deny; but as a finished speaker, matter, reasoning and flow considered, he is infinitely inferior to F. Blake, Wm. McDougall, Sir John Thompson and many others, and as an orator inferior to Chapleau, Davin and a score or more of other representatives in the House at Ottawa. The public were also disappointed in his promises as to action if entrusted with the responsibility of government. He told the people they should have cheaper coal oil, woolens, lumber, and barbed wire, but that was all. He never once touched the School Question, the Hudson's Bay R.R. or railway rates in a practical form. It is true he did refer to Blake's admonitions, when Sir John's government had but Hobson's choice, declaring the contract as drawn up would place the country too much in the power of the railway, but to the matter of remedy which is the only question before the people now he was as dumb as the dead.

SUPPLEMENT.

JAPANESE FLEET SIGHTED.

Despatches from Shanghai say the masters of several Chinese junks which arrived at Chefoo, report having sighted a large fleet of Japanese transports escorted by the warships on Tuesday night. The fleet was then entering the Gulf of Pei Chi Li, and after steaming westwards some distance the course of the warships and transports altered to about northeast. The Japanese fleet of warships and transports included 10 ships. Their presence in the gulf of Pei Chi Li caused the greatest excitement at Shanghai and elsewhere. In London it is believed the fleet referred to was an expeditionary force consisting of thirty thousand men, which left Hiroshima, the Japanese head quarters on September 26 under sealed orders and under command of Field Marshal Count Agama, the Japanese minister of war.

CANNOT DICTATE TERMS.

The London Morning Post insists that it is impossible to allow Japan to dictate terms to China without consulting the European powers. The Post discusses American interests in the question, and concluded that there are purely commercial while Europe's are also political. For the sake of the world's peace, it says, Russia, Germany, France and Great Britain must intervene.

CHINESE ON THE RUN.

The London Central New correspondent in Shanghai telegraphs: Seventy Japanese transports passed the northeast promontory near Chefoo on the morning of Oct. 2. New Chwang reports are to the effect that the Chinese are in full retreat from Mukden. Ten thousand armed Koreans are receiving Japanese pay.

THE PRESS ON THE SITUATION.

Commenting upon the eastern situation, the Post says: "The present position of China cannot be lightly regarded. If that empire was broken up or its position imperilled, the outlook would be extremely grave. Hitherto we have been accustomed to regard China as an ally, and we have treaties and agreements with her which require attention. Li Hung Chang is the only man of influence in China capable of advising the emperor at this juncture. He deserves any aid that England can afford him in the effort to save his country from the terrible dangers with which it is menaced."

The Graphic says: "It is time a halt was called by the European powers interested in keeping the peace. Neither Great Britain nor Russia can wish to see China permanently crippled by the Japanese. A state of chaos in the former empire would raise problems that might set the whole world ablaze."

China is endeavoring to negotiate a loan of £10,000,000.

A BIG DOLLAR'S WORTH.

The Winnipeg Weekly Tribune, which is acknowledged to have even by rival publishers the largest circulation of any paper published in Canada west of Lake Superior, is now offering great inducements to intending subscribers. It can be obtained from now to January 1st, 1896, for \$1—a very slight advance on the cost of the white paper used in its publication. At its regular price of \$1 a year the Weekly Tribune is certainly extra value, and with the balance of this year free the offer becomes an extraordinary one. The fact that the Weekly Tribune reaches more homes in the Northwest than any other paper published, is strong evidence that it is recognized as the great family newspaper. It publishes Dr. Talmage's sermon each week, and gives more Manitoba and Northwest news from its own correspondents than all other Winnipeg papers combined. This is specially interesting to the settler, as almost every district is represented. It can be had from now to the end of next year by sending \$1 to The Tribune Publishing Co., Winnipeg.

Nor'-Wester

TILL 1896 FOR \$1.00.

The favor with which the Nor'-Wester, as evidenced by the manner in which it has fairly leaped into circulation, has been received, is something almost unprecedented in the world's history of journalism.

"INDEPENDENT - NOT NEUTRAL" is the motto of the Nor'-Wester. It is not the organ of any political party or business enterprise; but is a journal always free to espouse, criticize or condemn the cause or contention of any party or organization—political, commercial or otherwise—as feels to the Northwest may, upon dispassionate and intelligent consideration, seem to demand.

At the price the Weekly Nor'-Wester is offered to new subscribers—One Dollar from any time hereafter till January 1st, 1896—but the merest fraction over the cost of the white paper used in it is asked. It is the largest Weekly paper published in Canada.

In subscribing, simply write name and post office on a piece of paper and enclose it and ONE DOLLAR in an envelope addressed
